The Rio Brazos Chapter of Texas Master Naturalist serves the counties of Hood, Johnson, and Somervell sponsored by the Texas Parks and Wildlife (TPW) and the Texas Cooperative Extension (TCE). Our organization was established in the Spring 2005, and we are currently staffed with about 40 members. As with the many other state-wide Master Naturalist chapters, we are a group of citizen volunteers committed to the beneficial management of our natural resources and natural areas through volunteer service and educational outreach. Detailed information about the program is available at the Texas Master Naturalist official website <http://masternaturalist.tamu.edu/>.

If you are interested in joining our chapter or you are seeking our assistance with an environmental activity that we might be able to support, please contact us. Our officers and contact info are listed in the Contact Link at <http://www.riobrazosmn.org>.
